

DATA FOR PROGRESS

From May 10 to 18, 2022, Data for Progress conducted a survey of 1,031 likely voters ages 18 to 25 nationally using web panel respondents. The sample was weighted to be representative of likely voters by age, gender, education, race, and voting history. The survey was conducted in English. The margin of error is ± 3 percentage points.

NB: subgroups with a n-size less than 50 (<50) are not shown on these cross-tabs. We choose not to display N<50 subgroups because the sample is too small to have statistical significance. We did, however, take samples of these subgroups for representational and weighting purposes to accurately reflect the electorate makeup. Some values may not add up to 100 due to rounding.

N=1,031 unless otherwise specified.

[1] Below are some practices used by large technology corporations. For each practice, please say how concerned or not concerned you are by them.

— Tracking and collecting detailed information on users' online activity

[21] When thinking about the role of the government in regulating large technology companies, which comes closest to your view, even if neither is exactly right? (N=512)

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	No College	College	Black or African American	White	Latino/a
The government should have a role in regulating large technology companies. Just like big tobacco companies hid the negative effects of cigarettes for years, big tech companies are hiding negative effects of their platforms. The public deserves safer, fairer social media platforms.	58	66	59	40	55	60	51	65	51	59	52
The government should not have a role in regulating large technology companies. Free markets should determine business leaders' actions and the government would be overstepping its role by intervening in private companies' affairs. The private sector should be free from burdensome government regulations.	30	23	26	52	32	29	33	28	32	32	34
Don't know	12	11	15	8	13	11	16	8	16	9	14
Weighted N	512	217	181	115	255	258	265	247	82	313	112

[22] When thinking about the role of the government in regulating large technology companies, which comes closest to your view, even if neither is exactly right? (N=519)

Response	Topline	Democrat	Independent / Third party	Republican	Female	Male	No College	College	Black or African American	White	Latino/a
The government should have a role in regulating large technology companies. Big tech companies dominate markets, eliminate competition from small businesses, and raise prices and limit options for consumers. The public deserves lower technology prices and more small business options.	55	69	51	43	58	52	54	57	50	59	41
The government should not have a role in regulating large technology companies. Free markets should determine business leaders' actions and the government would be overstepping its role by intervening in private companies' affairs. The private sector should be free from burdensome government regulations.	33	26	30	48	31	36	32	35	33	33	41

[32] A bipartisan group of lawmakers have recently proposed the American Innovation and Choice Online (AICO) Act. The AICO Act puts in place new rules and standards for large technology companies.

Supporters of the bill say these rules are necessary to limit major technology corporations abusing their power by squeezing out small businesses' products on their platforms and limiting consumers' choices.

Opponents of the bill say this comes out of political motivations to burden these companies and would fundamentally alter the internet, decreasing consumers' convenience on major technology platforms.

Knowing what you know now, do you support or oppose the AICO Act?

[33] A bipartisan group of lawmakers have recently proposed the Open App Markets Act, which would set new rules to promote competitive prices and smaller developers, while protecting consumers on app stores.

Supporters of the bill say that these rules are necessary to prevent large technology companies from dictating terms of the app stores and pushing only their own apps.

Opponents of the bill say that forcing large technology companies to comply would cause a surge of new, third-party developers on app stores, making them less safe.

Knowing what you know now, do you support or oppose the Open App Markets Act?
